

Stellar Waterworks is proud to offer our submersible cosmixers. Powerful mixers designed with ease of operation and built for longevity and dependability.

PERFORMANCE BENEFITS

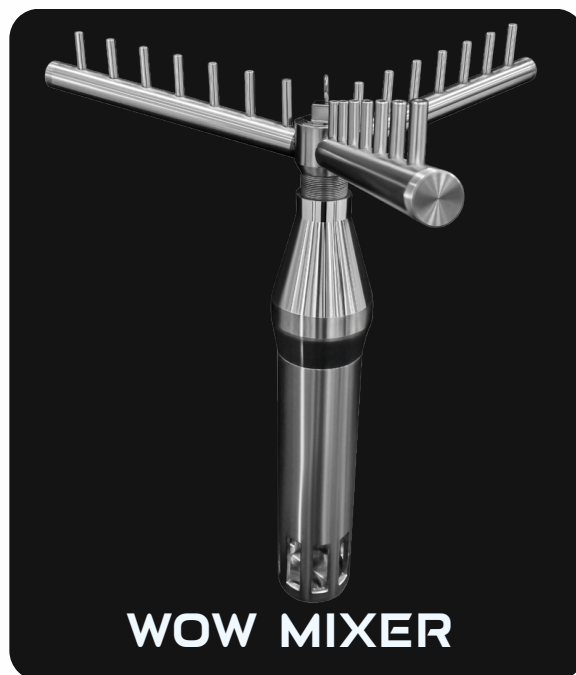

- Eliminates stratification and prevents stagnation
- Reduces nitrification in chloraminated systems
- Diminishes biofilms and bacteria growth
- Mitigates DBP's (THMs and HAAs)
- Minimizes tank maintenance
- Helps prevent ice damage
- Eliminates short circuiting and increases contact time and baffle factor

TECHNICAL HIGHLIGHTS

- Engineered for easy installation
- Near-zero maintenance
- Designed to be installed and forgotten
- Fits through hatches and vents as small as 18 inches
- Suspended design allows universal installation in all tank types and tank floors
- No tank entry required
- 316SS construction
- Pump and motor certified NSF/ANSI 61 & 372, all other components approved to these standards
- Available for all power sources
- Nozzles enhance and magnify induced flow
- Creates a 32" diameter rising column of water
- For all tank volumes and types
- Open bottom flow sleeve configuration for taller ground storage tanks available upon request
- 5-year warranty

UFO MIXER

WOW MIXER

DESIGNED FOR PERFORMANCE, BUILT FOR RELIABILITY.

Any tank, any size - a mixing solution built for your needs.

Every tank is built differently, and at Stellar Waterworks, we engineer the flow of the future designed to your specific needs. Our mixers deliver reliable, consistent mixing to eliminate your water quality challenges.

Both the WOW and the UFO mixers can be easily installed through your tank hatch or vent without the need to temporarily deactivate or drain the tank.

Once deployed, our mixers circulate the entire tank volume ensuring uniform disinfectant residuals and consistent water age, and eliminating stratification.
